

The Genetics of Mental Disorders: a talk by Dr. Stephen Glatt

Saturday,
October 7
2 to 4 pm
The Space at
GreenStar
700 W. Buffalo, Ithaca

Are mental disorders genetic or environmental?

Can schizophrenia be inherited?

What are the chances of inheriting a mental illness?

What is the latest biological research on mental disorders?

Stephen Glatt, PhD is an experimental psychologist and genetic epidemiologist. He is Director of the Psychiatric Genetic Epidemiology & Neurobiology Laboratory at SUNY Upstate Medical University in Syracuse.

National Alliance on Mental Illness

NAMI Finger Lakes

Presented by NAMI Finger Lakes with support from The Triad Foundation
